

CRP - CARBON REDUCTION PLAN

Publication date: 27.05.2026

Commitment to achieving Net Zero

Q Surgical, is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
Q Surgical have committed to reaching Net Zero by 2050 Emissions data had not been published in prior years therefore we selected 2022 as our base year. This the first time the company has measured and reported on its carbon emissions and therefore 2022 is our benchmark year. i.e. from January 2022 to December 2022. The benchmark data is available for the period January 2022 – December 2022	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0.000 (tCO₂e)
Scope 2	30,864.68
Scope 3 (Included Sources)	0.000 (tCO₂e)
Total Emissions	30,864.68

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.000 (tCO₂e) <i>Scope 1 emissions are currently reported as 0.000 tCO₂e as Q-Surgical does not presently own or control combustion-based operational assets, company vehicles, or fuel-burning equipment that would generate direct Scope 1 emissions. The company will continue to review its operational activities annually to ensure any future Scope 1 emission sources are identified and reported accordingly.</i>
Scope 2	25,720.56
Scope 3 (Included Sources)	0.000 (tCO₂e) <i>Q-Surgical has not previously collected complete Scope 3 emissions data for the required reporting categories. During 2026, the company will implement data collection processes covering upstream transportation and distribution, waste generated in operations, business travel, employee commuting, and downstream transportation and distribution. This data will be incorporated into the next annual Carbon Reduction Plan update in accordance with PPN 006 requirements.</i>
Total Emissions	25,720.56

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 19,000.00 tCO₂e by 2029. This is a reduction of 25%.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline. The carbon emission reduction achieved by these schemes equate to 5,144 tCO₂e, a 16.67%ge reduction against the 2022 baseline and the measures will be in effect when performing the contract.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹

¹<https://ghgprotocol.org/corporate-standard>

and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

H Brown
Company Director
